

NOTICE TO CALIFORNIA COMMERCIAL FISHERMEN AND PROCESSORS

SOUTHERN ROCKFISH

Fish Landed South of 40° 10' (near Cape Mendocino)

- Rockfish species that **must be sorted** prior to weighing because there is a trip limit, size limit, or separate species optimum yield. The weight must be reported separately by species on the Fish and Game receipt:

Nearshore

Black

☼Black- and- Yellow

☼China

☼Gopher

☼Grass

☼Kelp

☼CA Scorpionfish

Shelf

Bocaccio

Canary

Chilipepper

Shortbelly

Widow

☼Yelloweye

Slope

Splitnose

☼Darkblotched

☼These species are part of the “Minor Rockfish” sort groups and do not have individual species trip limits. Landings remain a part of the minor rockfish sort group and are counted toward the minor rockfish trip limits.

Minor Rockfish

- Rockfish species not listed above which, at a minimum, **must be sorted**, prior to first weighting, into one of the three minor rockfish sort groups (below). These weights must be reported separately on the Fish and Game receipt. Further sorting and reporting of these species individually is encouraged. If so reported, the landed weight counts toward the sort group trip limit along with any combined species landings and landings of those species asterisked above.

Deep Near-Shore (976)	Shelf (974)		Slope (975)
Blue	Bronzespotted	Redstripe	Aurora
Brown	Chameleon	Rosethorn	Bank
Calico	Dwarf-Red	Rosy	Blackgill
Copper	Flag	Silvergrey	Pacific Ocean Perch
Olive	Freckled	Speckled	Redbanded
Quillback	Greenblotched	Squarespot	Rougheye
Treefish	Greenspotted	Starry	Sharpchin
	Greenstriped	Stripetail	Shortraker
	Halfbanded	Swordspine	Yellowmouth
	Honeycomb	Tiger	
	Mexican	Vermilion	
	Pink	Yellowtail	
	Pinkrose		
	Pygmy
